Dear Hiring Manager,

I am excited to bring my expertise in collecting, cleaning, and analyzing raw data to your Company. As the Data Analyst, I can help develop actionable strategic insights that will help your company grow. With my skills in SQL programming and data visualization, I am confident I would be a great fit for the position.

I have always been passionate about numbers and analytics, which led me to pursue a Certificate in Data Analytics at Google. It's a 6 month extensive training online program. Demonstrated hands-on experience with problem-solving, data cleaning, data visualization, interpreting and communicating data analytic findings. Confidence in transforming complex data into actionable and clear insights. Fluency in computer programming languages and a solid understanding of databases are a plus. I have since then completed 2 projects where I interpret data, analyze results and produce reports to help the marketing team drive sales. I am eager to bring my knowledge to the Entry Level Data Analyst position with your Company. I would love to join your team so I can help deliver strategic insight and recommendations that will help your Company increase customers and sales.

I have attached my resume, which outlines my education and my Portfolio. Please feel free to contact me anytime to further discuss my qualifications. Thank you for your time and consideration.

Sincerely,

Raksha Kandasamy Chandramohan.
